

CODERKIDS™

CREATE. LEARN. INSPIRE.

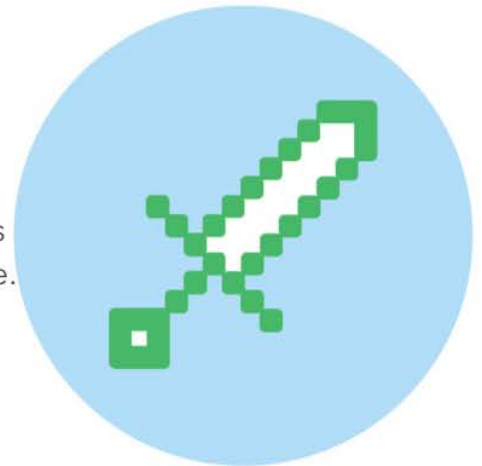

Coder Kids offers after-school computer science courses for girls and boys ages 7 to 13. Our innovative, self-paced courses and our low 1:4 Tutor-CoderKid ratio enables CoderKids to develop their coding skills while expressing their own interests at their own pace.

Minecraft Mods and Video Game Maker

Minecraft Mods and Video Game Maker

- ✓ In Minecraft, Coder Kids create mods using Java to make custom recipes, items, armor and tools in their Minecraft world.
- ✓ In Scratch, Coder Kids will create their own sprites, backgrounds, and power-ups for their games. Coder Kids will use variables to keep score and make their own game.
- ✓ Existing Coder Kids will pick up where they've left off in their last class. New and experienced coders welcome.
- ✓ Recommended for grades 2-6.

Dates: 9/26, 10/3, 10/10, 10/17, 10/24, 10/31, 11/7, 11/14

Time: Wednesdays 3:25 pm to 4:25 pm

Location: Teacher's Lounge

Registration: coder-kids.com/stenwood

CoderKids create games, sites and apps with their own code and at their own pace!

WHAT IS CODING?

The core building block of all digital technologies, writing code, or coding, is used to create websites, smartphone apps, and even the software that runs your car. The world is built on code!
